Merchant <-> Juspay

Merchant	Juspay	Gateway

1. OrderCreate request →

← 2. OrderCreate response

3. Fulfillment Attempt →

> Juspay will process attempts asynchronously

← 4. Juspay polls for fulfillment status

> Juspay will mark the transaction as failure/success based on the gateway's response

← 5. Juspay sends a callback post status update

> Juspay retries the transaction if the transaction has failed and retry_attempt_policy mentions a retry for the particular scenario

6. Juspay retry attempt →

← 7. Final order level callback

> Merchant to have a fallback for polling the status for order
